AFTER EFFECTS: Motion Graphic Animation.

As an international student. I have some words to say about the underground system under this great city.

It's actually quite clear what I'm going to say, so I won't say it for now.

The project is inspired from the experience of unable to connect internet underground. I cannot open map, message, or browser. It causes me big problems as I don't always know the road.

So, I created a small animation talking about an old man who met the same problem with me.

The whole set is really simple, I used some color change to add more dramatic feelings. I didn`t use any of those fancy technique because I cannot. You can see the scene and elements didn`t change a lot throughout the whole animation. Therefore, not that much of process I can give.

Thanks for reading.
